VERITRUST

DRIVER GUIDE — VT FLEET INSPECTIONS

How to fill out a vehicle inspection (DVIR) on the VT Fleet app

01 BEFORE YOU START

Every vehicle gets an inspection report (DVIR) at the **start** of your shift and at the **end** of your shift. It takes about 3 minutes.

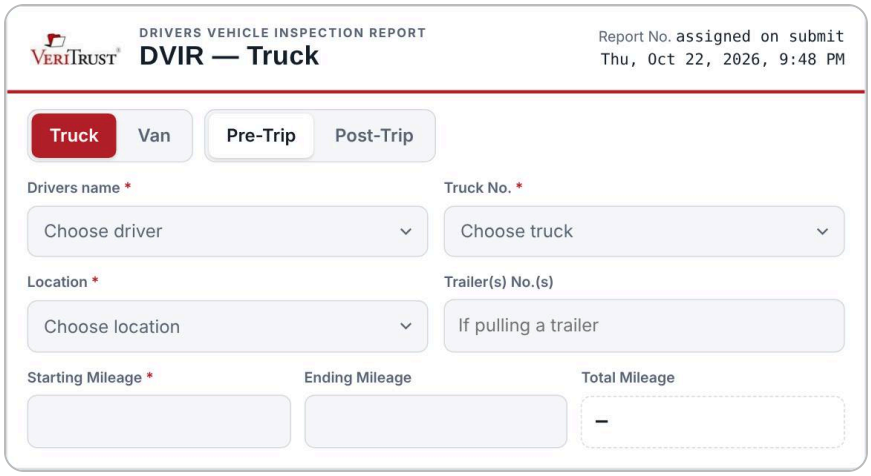

Open the **VT Fleet** app from the iPad home screen. It works the same on the company iPad and on a phone.

1. Tap the **VT Fleet** icon on the home screen.
2. If the icon is missing: open Safari, go to **veritrust-corp.github.io/vt-fleet**, tap the Share button (square with an arrow), then **Add to Home Screen**.
3. The app saves your work as you go. If you get interrupted, open it again and your answers are still there.

> **REMEMBER**
> Your supervisor gives you your own 4-number PIN. You type it to submit every report. Never share it.

02 TRUCK OR VAN — PRE-TRIP OR POST-TRIP

At the top of the form, pick the vehicle type and the kind of inspection.

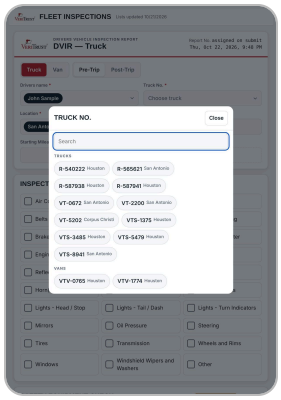

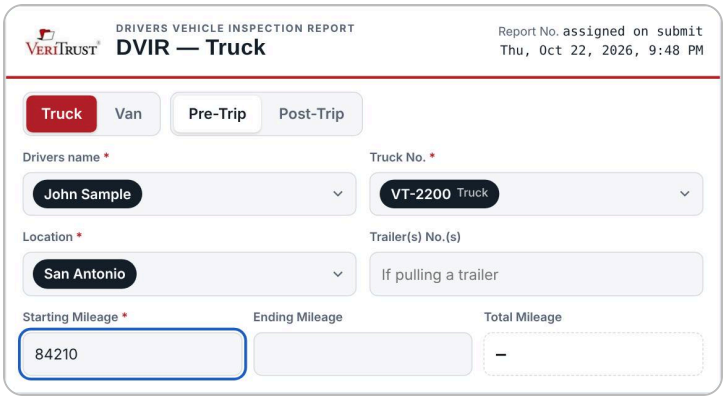

1. Tap **Truck** or **Van**. The checklist and the damage drawing change to match.
2. Tap **Pre-Trip** before you drive the vehicle.
3. Tap **Post-Trip** when you are done driving it — at the end of your shift, or when you hand the vehicle to another driver.

> **REMEMBER**
> One vehicle, one driver, two reports: a Pre-Trip when you get in, a Post-Trip when you get out.

03 YOUR NAME, TRUCK AND LOCATION

Tap each box to open a list. Tap your choice and the list closes.

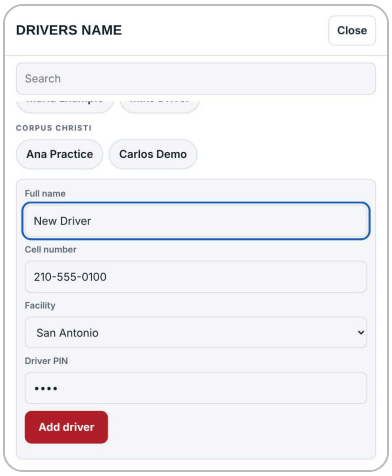

1. **Drivers name** — find your name. Type a few letters in **Search** to find it fast.
2. **Truck No.** — pick the number painted on the vehicle. Trucks and vans are listed by facility.
3. **Location** — the facility where you start.
4. **Trailer(s) No.(s)** — only if you are pulling a trailer.

REMEMBER

Fields with a red star (*) are required. The app will not send the report until they are filled in.

04 NOT ON THE LIST? ADD YOURSELF ONCE

New drivers can add their own name. Search first — if your name is already there, do not add it again.

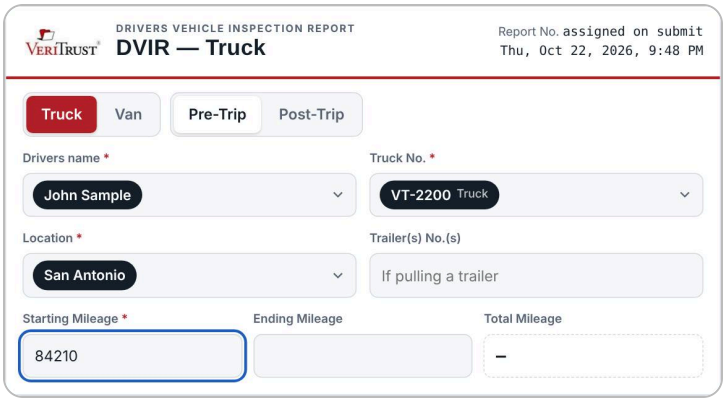

1. Tap **Drivers name**, scroll to the bottom and tap **+ Add new driver**.
2. Type your **first and last name**, your cell number, and pick your facility.
3. Type the **New-driver code** from your supervisor and tap **Add driver**.
4. Your name is sent to the fleet office right away and is picked for this report.

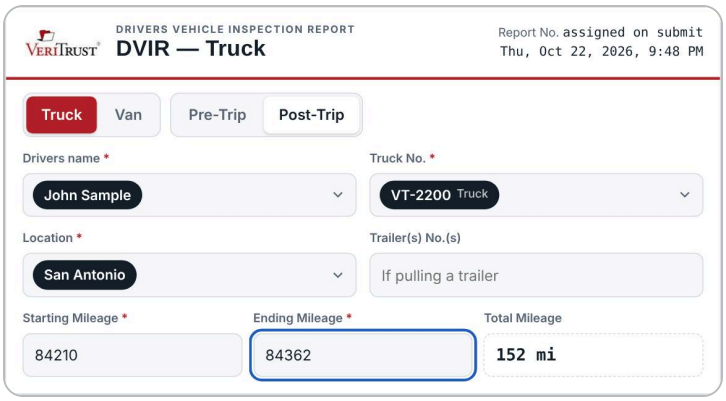

REMEMBER

Other iPads show your name after the office updates the driver list.

05 MILEAGE — READ THE ODOMETER

Mileage tells the office when each truck needs maintenance. Type the exact odometer number — never guess.

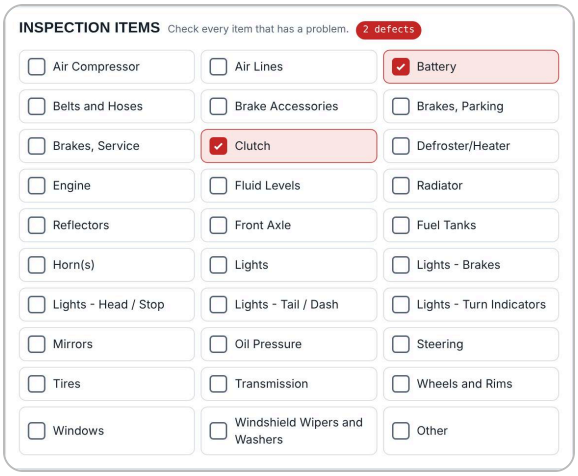

1. **Pre-Trip:** type the **Starting Mileage**. Leave Ending Mileage empty.
2. **Post-Trip:** the **Starting Mileage** is filled in for you — the app remembers it from your Pre-Trip on the same device. A small message pops up: *Starting mileage from your pre-trip: 85,120*.
3. Just type the **Ending Mileage** on the odometer now. The app figures the **Total Mileage** for you.

REMEMBER

If the Starting Mileage is empty on your Post-Trip (you used a different iPad or phone, or no Pre-Trip was done), just type your morning number like before. Handing the vehicle to another driver at lunch? You do your Post-Trip with the ending mileage. The next driver does his own Pre-Trip. The office gets an alert every evening for any Pre-Trip without a Post-Trip.

06 INSPECTION ITEMS — CHECK ONLY PROBLEMS

Walk around the vehicle and look at each item on the list.

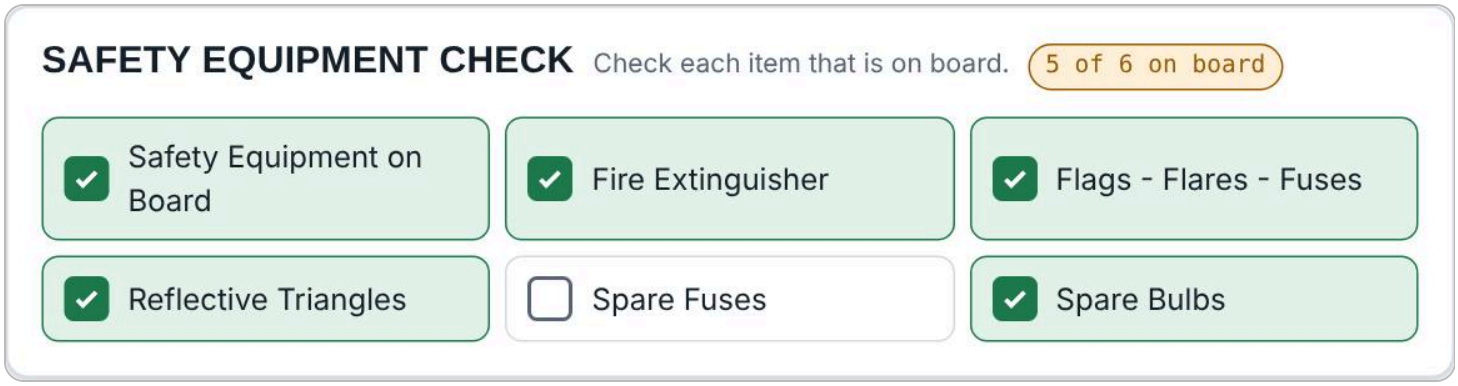

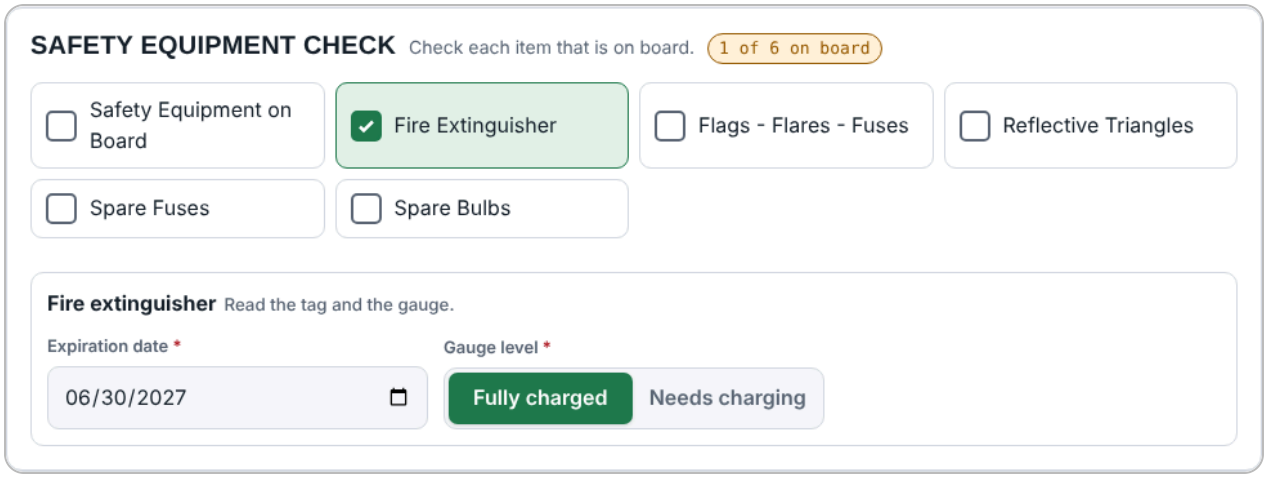

1. **Check a box only if that item has a problem.** It turns red.
2. Leave a box empty if the item is OK.
3. The red counter at the top shows how many defects you checked.
4. Explain each problem in **Remarks** (what is wrong and where).

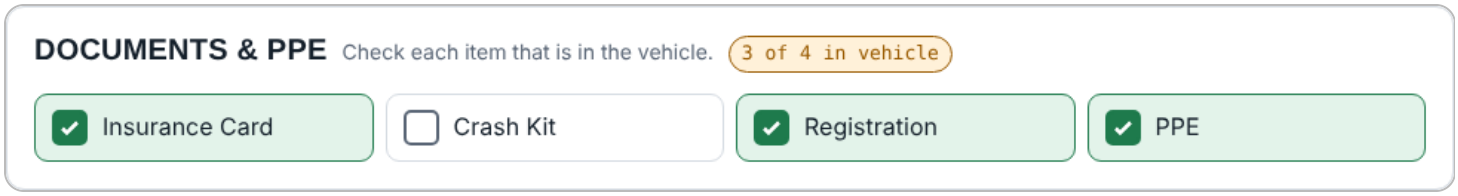

> **REMEMBER**
>
> Empty box = OK. Checked box = problem.

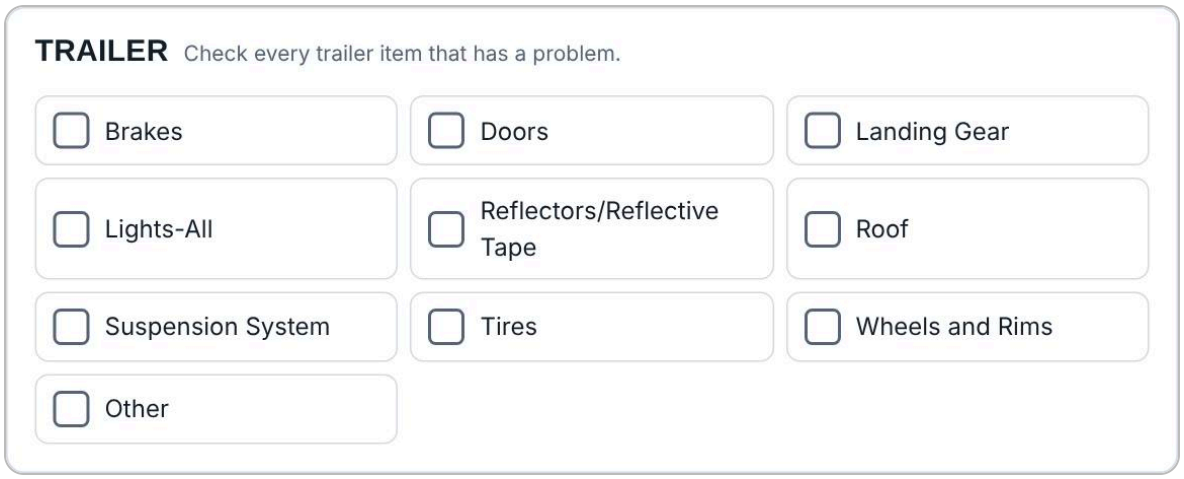

07 SAFETY EQUIPMENT — CHECK WHAT IS ON BOARD

This section works the **opposite** way from the inspection items.

1. **Check each safety item that IS on board** (fire extinguisher, triangles, spare fuses and bulbs). It turns green.
2. If something is missing, leave it empty and write it in Remarks.

3. When you check **Fire Extinguisher**, two questions open. Pick the **expiration date** printed on the tag, then tap the gauge level: **Fully charged** (needle in the green) or **Needs charging**. You must answer both before you can submit.
4. **Documents & PPE**: check each one that IS in the vehicle: **Insurance Card**, **Crash Kit**, **Registration** and **PPE**. If one is missing, leave it empty, write it in Remarks and tell your supervisor.
5. **Trailer** section (trucks only): like the inspection items — check only trailer items with a problem.

> **REMEMBER**
> Safety equipment: green check = it is there. Everything else: red check = problem.

08 REMARKS — SAY WHAT IS WRONG

Remarks help the mechanic find and fix the problem fast.

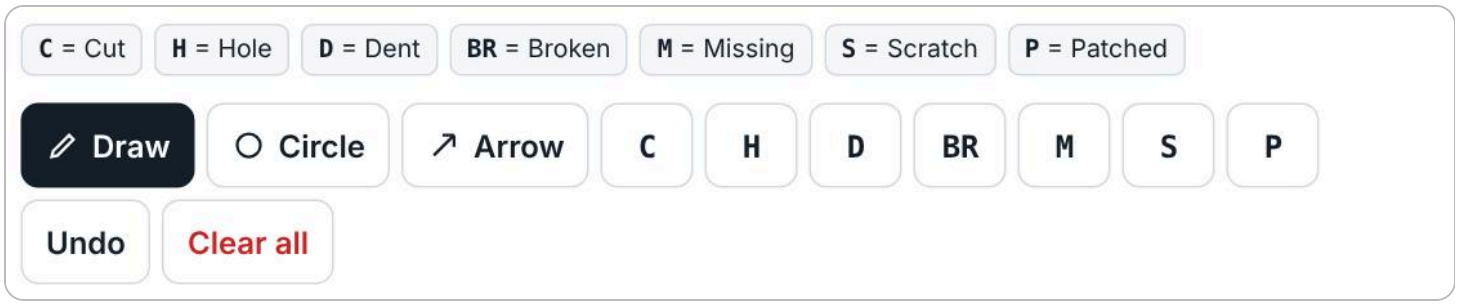

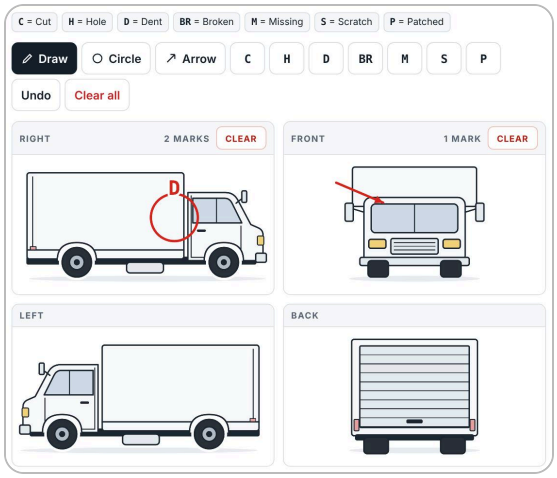

1. Type in the box, or tap the **microphone** and speak.
2. Say what is wrong and where: *“Left mirror cracked. Right brake light out.”*
3. Also write any safety item that is missing.

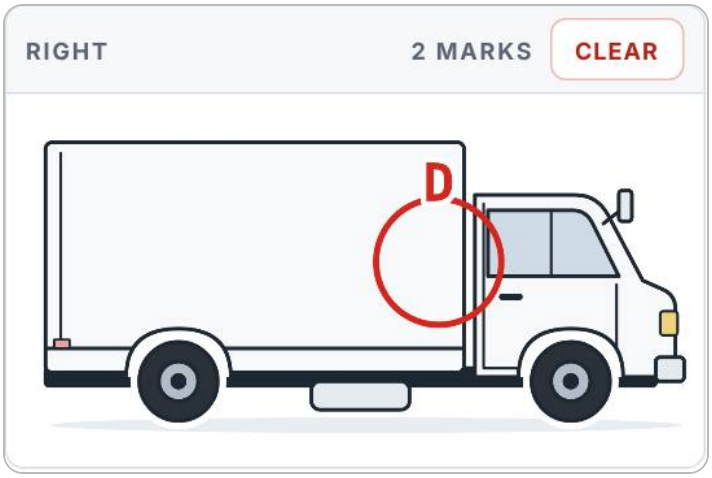

> **REMEMBER**
> Short and clear is best.

09 DAMAGE DRAWING — MARK IT WHERE YOU SEE IT

The drawing shows the vehicle from the right, front, left and back. Mark every dent, scratch or broken part on the correct side.

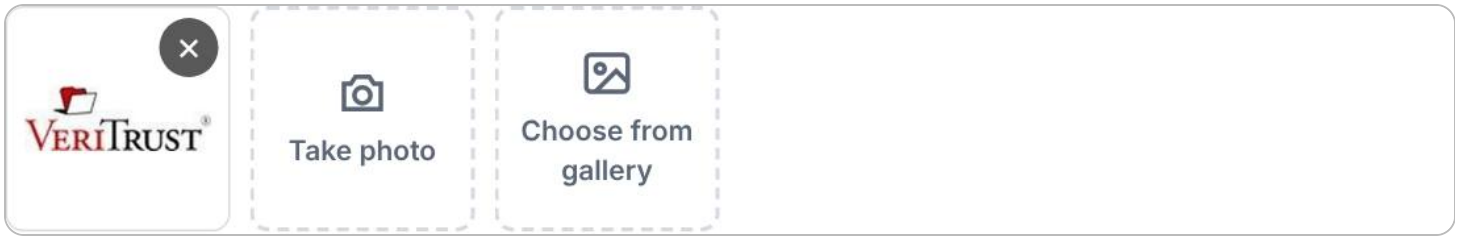

1. Pick a tool: **Draw** (your finger), **Circle** (drag to size) or **Arrow** (drag to point).
2. Letter buttons add a label: **C** Cut, **H** Hole, **D** Dent, **BR** Broken, **M** Missing, **S** Scratch, **P** Patched. Tap the letter, then tap the spot.
3. Made a mistake? **Undo** removes your last mark.
4. **Clear** on a side erases only that side. Tap it twice (the first tap shows “Tap again”).
5. **Clear all** erases every side. It also asks for a second tap.

REMEMBER

Circle the damage and add the letter next to it — the mechanic sees both the place and the type.

10 DAMAGE PHOTOS

A photo of the damage protects you and the company.

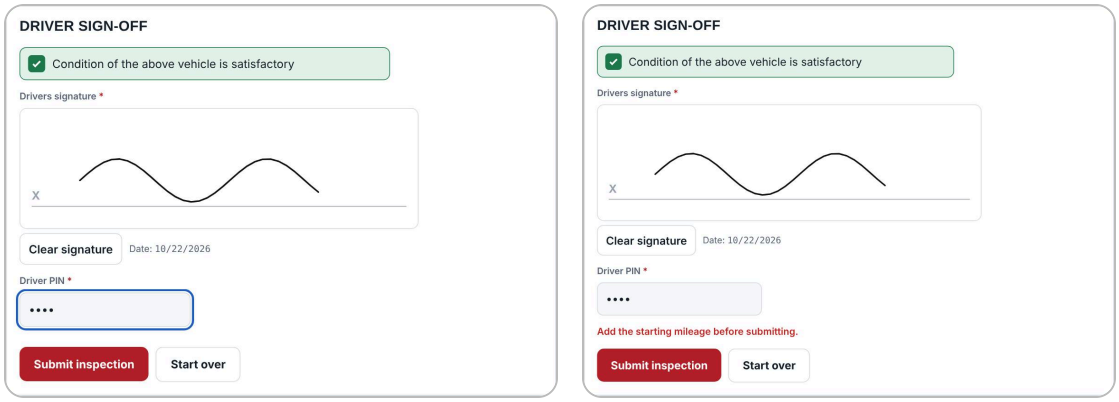

1. **Take photo** opens the camera.
2. **Choose from gallery** picks photos you already took with the regular camera — use it if the app camera does not work.
3. Tap the ✕ on a photo to remove it.

> **REMEMBER**
> Add photos right before you submit. If the app is closed before you submit, photos must be added again.

11 SIGN AND SUBMIT

The last section is your signature. You are certifying what you reported.

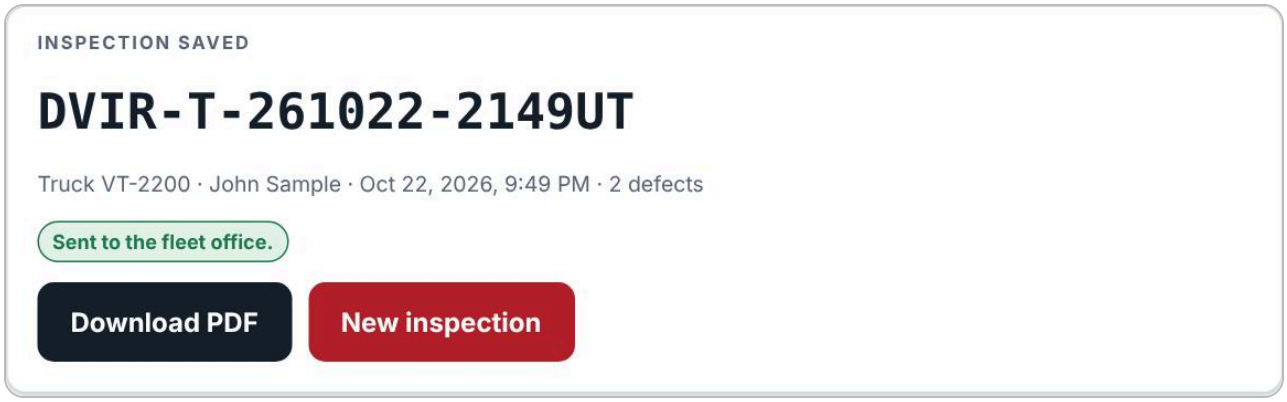

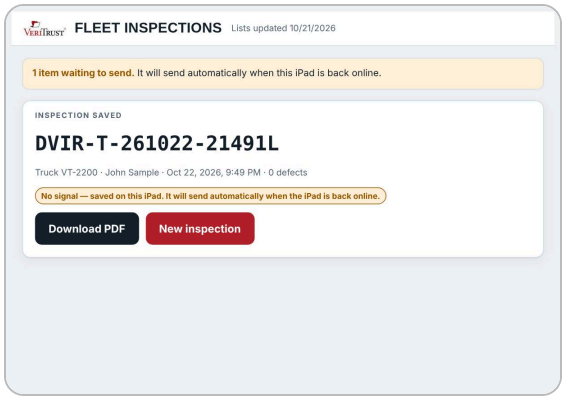

1. Check **Condition of the above vehicle is satisfactory** only if the vehicle is safe to drive.
2. Sign in the box with your finger. **Clear signature** lets you sign again.
3. Type the **Driver PIN**.
4. Tap **Submit inspection**.
5. If something is missing, a red message tells you what to fill in. Fix it and tap Submit again.

> **REMEMBER**
> Not safe to drive? Do not check the satisfactory box — call your supervisor.

12 AFTER YOU SUBMIT

You will see your report number and a message.

1. **Sent to the fleet office** (green) — you are done.
2. **No signal — saved on this iPad** (yellow) — that is OK. The report waits on the iPad and sends by itself when there is signal. **Do not fill it out again.**
3. **Download PDF** keeps a copy if you want one.
4. **New inspection** starts the next report. Your name and location stay filled in.

> **REMEMBER**
> A yellow bar at the top means reports are still waiting to send. Leave the app as it is; they send on their own.

QUICK RULES

- Pre-Trip before you drive. Post-Trip when you stop driving or hand the vehicle off.
- Pre-Trip: starting mileage. Post-Trip: starting and ending mileage.
- Inspection and trailer items: check only problems.
- Safety equipment: check what IS on board.
- Fire extinguisher: enter the expiration date and the gauge level.
- Documents & PPE: check insurance card, crash kit, registration and PPE that ARE in the vehicle.
- Mark damage on the correct side; add a photo.
- Sign, type the PIN, Submit. Yellow “No signal” = it will send by itself.
